RAGUL

Full-Stack Developer | AI/GenAI

Salem, India | +91 8637632230 | ragulkathir.dev@gmail.com | Portfolio | LinkedIn

EXPERIENCE

Full Stack Development Intern — Odugaa Tech Pvt. Ltd.

- Built RESTful APIs and implemented both frontend and backend functionality, integrating MySQL for data management.
- Practiced full-stack development, Git-based version control, and web application deployment in a live team environment.

PROJECTS

FactGuard – AI-Powered Fake News Detection System

- Applied prompt engineering with Google Gemini (LLM) to build a two-stage AI reasoning pipeline: understanding the claim, then generating a verdict from gathered evidence.
- Integrated NewsAPI, GNews, and CricketAPI for live news and real-time sports-score evidence.
- Built a multi-engine OCR pipeline (EasyOCR, Tesseract, PaddleOCR) and used trafilatura to extract article text from URLs.
- Cross-referenced verdicts against trusted news domains to compute confidence scores; built a tabbed Text/Image/URL frontend.

Tech Stack: Python, FastAPI, Google Gemini (LLM), Prompt Engineering, NewsAPI, GNews, CricketAPI, EasyOCR, Tesseract, PaddleOCR, trafilatura

VisionAttend – AI-Powered Face Recognition Attendance System

- Built a three-tier attendance system: a Python computer-vision pipeline, a Spring Boot REST backend, and a React dashboard.
- Used OpenCV's YuNet (detection) and SFace (recognition) models, replacing a legacy Haar Cascade + LBPH approach for higher accuracy.
- Matched live webcam faces to enrolled students in real time using cosine-similarity on face embeddings.
- Designed idempotent REST APIs (Spring Boot, JPA, MySQL) and a React (Vite) dashboard with on-demand refresh.

Tech Stack: Python, OpenCV (YuNet, SFace), Spring Boot, Java, MySQL, JPA, React

College Stationery Shop – Digital Account System

- Built a full-stack replacement for a campus shop's paper account book, tracking each fresher's ₹5000 deposit, purchases, and top-ups.
- Designed a layered Spring Boot backend (Controller → Service → Repository → Entity) with JPA entities and REST APIs.
- Built a React + Axios frontend with Student and Staff/POS portals, live student search, and a sales-reporting endpoint.

Tech Stack: Java, Spring Boot, Spring Data JPA, H2/PostgreSQL/MySQL, React, Axios

SUMMARY

Computer Science student with strong, demonstrable coding skills in Java and OOP concepts, and hands-on experience building full-stack applications with React and Spring Boot. Applied LLMs and prompt engineering with Google Gemini to build a real AI-driven verdict pipeline, not just as a coding aid. Looking for a Software Engineer role where I can contribute quickly and keep growing.

EDUCATION

Bachelor's Degree in Computer Science Engineering

Government College of Engineering, Salem-11

CGPA: 7.65 / 10

Transferred from GCE Tirunelveli (08/2023 – 10/2024), CGPA: 7.90 / 10

SKILLS

AI / GenAI

LLM Integration, Prompt Engineering, Google Gemini API

Frontend

HTML, CSS, JavaScript, React

Backend

Java, Spring Boot, Python, FastAPI, REST APIs

Database

MySQL, JPA, H2, PostgreSQL

Tools

Git, GitHub, VS Code, IntelliJ, OpenCV

Fundamentals

DSA, OOP, DBMS, OS, CN

CERTIFICATIONS & ACTIVITIES

- Smart India Hackathon (SIH) – Participant (2025)
- CM Trophy & Zonal Level Cricket Certification – TN Govt. (2025)
- Active Member — Rotaract Club, GECO Tech Club, Sports Club
